Task 4

Please list 3 personal goals that you would feel could help you in a performance setting:

1. Over exaggerating dance movements
2. Practicing full out
3. Learning the choreography quicker

What strategies could you employ to achieve these goals?

In order to ~~achieve~~ achieve these goals I ~~to~~ could take more time practicing the dances.

Please describe any personal or group successes you enjoyed during the implementation of this project:

I liked taking a part of the dance that our group made up, and including the rest of the class in that section.

Do you feel that you were able to demonstrate leadership throughout the choreographic process? Is there any way that you could have done this more?

Yes, through the creating of choreography I took a high leadership role. I ~~assisted~~ <sup>took</sup> part in watching each solo and applying my opinion as to where I thought which solo should go in the group.

What practices do you feel helped you to be successful in performance?

The fact that we got to perform the dance in front of different audiences was good practice for each upcoming performance.

Would you do anything differently to enhance future performances?

I would not do anything differently to enhance future performances other than practicing the dance.
